IDENTIFY RISK FACTORS THAT OTHERS MISS

A focus on the seriously ill and chronically complex.
The 5% of patients making up over 50% of your cost/risk.

More focused and accurate prediction time frames.
Unlike others, we predict time frames of 3, 6, 9 months.

We use data independent of an organization's oasis & EMR.
Critical insights without waiting on traditional data sources.

We provide you with exclusive data and the right analytics.

- Risk Scoring
- UtilizationPredictions

- Network Scoring
- John Hopkins ACG

- Social Determinant Analytics
- Future High-Cost/High-Needs Members

HCC CODING OPPORTUNITIES

- At-a-glance patient Face Sheets for providers
- Detailed reporting for administrators

- Improve coding accuracy, revenue opportunities, and compliance
- Real time identification of HCC coding opportunities

- HCC Coding for proper tiered placement and reimbursement and network analysis

REAL-TIME ER UTILIZATION ALERTS & PREDICTIONS

- Know when a patient makes an emergency visit and prevent having to cover costs.
- Quickly intervene when a patient uses the hospital rather than a more appropriate care setting.
- Immediately contact a patient's family to have a conversation regarding hospital admission.
- Notify partners to indicate a patient is ready for a transition to end-of-life care rather than costly hospital stay.
