BEYOND YOUR EHR

The Platform You Need to Succeed in Value-Based Care

No EHR system can give you an up-to-date, 360-degree view of your patient's entire continuum of care: Every documented condition. Every specialist visited. Every treatment offered. Every prescription filled. Every recent admission to and discharge from the ED. Every indication that your patient may need intervention.

Acclivity Health's cloud-based, connected care platform gives you all the data — aggregated in one place — that you need to succeed with your value-based contracts. It unlocks the answers to three questions you must address before you can provide truly proactive, preventive, and coordinated care.

WHO?

Should we pay more attention to?

WHAT?

Should we do to treat & what conditions should we manage?
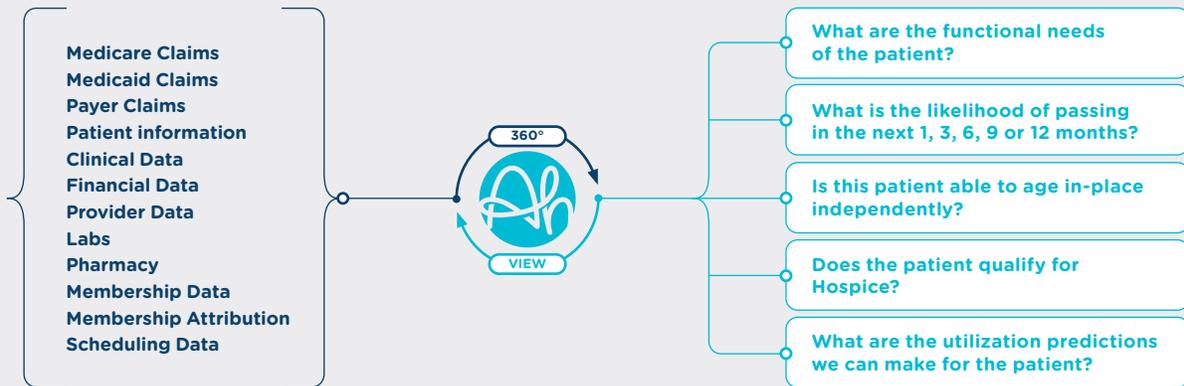

WHERE?

Should patients receive treatment and care?

THE KEY TO ENHANCING CARE

Gain actionable insights with automated feedback that helps you ensure your patients — especially the sickest and most vulnerable — receive appropriate and affordable care that is consistent with their goals and values.

With Acclivity, you have the key to enhancing care quality and earning shared savings and bonuses while minimizing financial loss. The Acclivity platform integrates with your EHR system, adding critical analytics, artificial intelligence, machine learning, workflow management and patient engagement tools you can use at the point of care or to securely collaborate with multiple disciplines within the care team.

360°
VIEW

What are the functional needs of the patient?

What is the likelihood of passing in the next 1, 3, 6, 9 or 12 months?

Is this patient able to age in-place independently?

Does the patient qualify for Hospice?

What are the utilization predictions we can make for the patient?

THRIVE WITH ACCLIVITY

Experience the unique capabilities Acclivity offers to practices serving high risk, high utilization patients with advanced illness:

1. Reduce ER utilization and inpatient readmissions through improved transition of care services.

2. Increase revenues from targeted programs to drive enhanced care management and better financial outcomes from your total patient panel.

3. Measure the disease burden for all your patients, without a physical examination, using Acclivity's Palliative Performance Score (PPS) estimates.

4. Build cohorts for targeted referral programs by refining the eligible patient list using palliative indicators like mortality risk, risk of hospitalization, and psychosocial issues.

We want to help your practice thrive. Acclivity is more than a unique technology platform. As your committed partner, we provide the service and support you need to maximize your investment in our technology.
