

How Acclivity Helps You Succeed with Value-Based Insurance Design's Hospice Benefit Option

CMS designed the Hospice Benefit Option for its Value-Based Insurance Design (VBID) program to improve the clinical and financial management of patients with serious illness. Participating MAOs will struggle to succeed with VBID without having access to insights they can trust to lower acute utilization, improve clinical outcomes, and increase patient and provider satisfaction.

RIGHT CARE, RIGHT PLACE, RIGHT TIME

Acclivity Health's sole focus has been to help the healthcare industry get the right level of care to seriously ill patients at the right time. We are uniquely qualified to help you succeed with Value-Based Insurance Design's Hospice Benefit Option because we give you the ability to:

- 1 Identify proactively those beneficiaries who could benefit from serious illness management and bring care to them before they need to find care in a crisis.
- 2 Build a continuum of care that responds to the beneficiary's level of need.
- 3 Create accountable, risk-sharing partnerships with your hospice and palliative care network to ensure timely and easy transitions.
- 4 Establish a hospice and palliative care network that provides care across that continuum.

EMPOWER YOUR MAO TO CREATE POSITIVE CHANGE

With the Acclivity platform and expert consultation, your MAO has access to the most comprehensive, multi-level patient data from a multitude of internal and external sources. Your providers gain:

- **Our established network:** to facilitate partnerships, drawing from around 200 hospices and providers across 50 states and 19 payers and healthcare systems
- **Actionable insights:** to help with clinical decision making
- **Workflows:** to engage the full interdisciplinary team
- **Predictive risk analysis:** to anticipate risk for every level of healthcare utilization
- **Palliative Performance Scores:** to inform palliative care interventions and hospice eligibility
- **Quality dashboards:** to monitor quality and process metrics for VBID

REDUCE COST AND INCREASE QUALITY OUTCOMES

With Acclivity, you'll be able to right-size care to minimize unnecessary acute utilization and high-end spending. Plus, you'll gain the flexibility to offer appropriate interventions that reduce the cost of care while increasing quality outcomes.
