

BEYOND YOUR EHR

A Platform Built To Help You Succeed With Primary Care First

As a Primary Care First (PCF) practice, you have the opportunity to increase your revenue by 50% by meeting key performance measures in your contract. But do you have all the tools you need to manage your higher risk patients effectively, so you can meet that financial goal?

No EHR system can give you the most up-to-date, 360° view of your patient's entire continuum of care: Every documented condition. Every specialist visited. Every treatment offered. Every prescription filled. Every recent admission to and discharge from the ED. Every indication that your patient may need intervention.

Acclivity has filled that gap with our cloud-based, connected care platform, designed specifically to improve the care of high risk and high utilization patients. Acclivity integrates with your EHR to give you the additional data you need — aggregated in one place — to provide the kind of proactive, preventive, and coordinated care that reduces utilization and healthcare costs while improving care quality and patient experience. The platform delivers critical analytics and automation that help you answer **three essential questions:**

WHO?

Who should you schedule for in-person treatment?

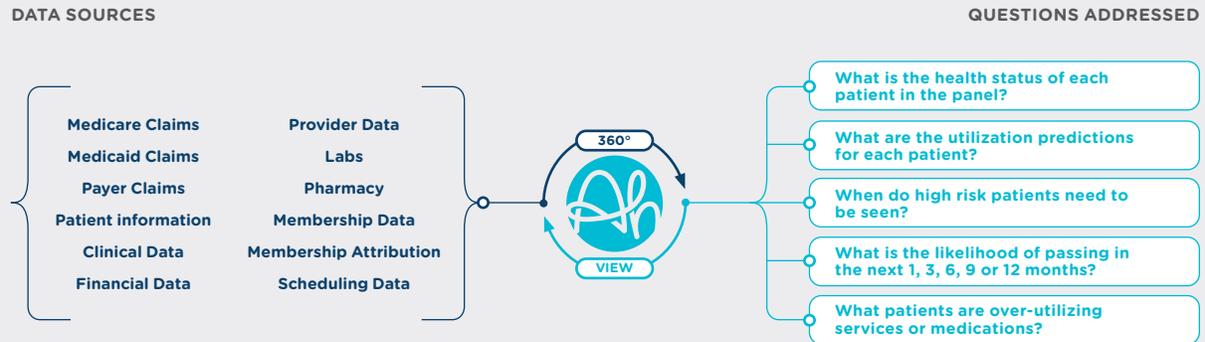

WHAT?

What should you do to treat & what conditions should you manage?

WHERE?

Where should patients receive treatment and care?

ACCLIVITY'S 360° VIEW OF A PATIENT'S HEALTH SITUATION

ENSURE SUCCESS WITH ACCLIVITY

Under the PCF program, your practice is protected against decline in patient visits with prepaid per-member/per-month payments. In order to receive quarterly performance-based bonuses, however, you need to ensure that your patients — especially the sickest and most vulnerable — receive consistent, appropriate and affordable care that improves their outcomes and experience.

Experience the unique capabilities Acclivity offers to practices serving high risk, high utilization patients with advanced illness:

- Support for contract negotiation
- Monitoring for PCF performance metrics
- Cost-of-care tracking across all providers and care delivery settings
- Disease burden measurement for all of your patients using Acclivity's Palliative Performance Score (PPS) estimates
- Automated referral process into hospice that enhances staff workflows for end-of-life patients
- Reductions in ED utilization and inpatient readmissions through real time notifications of your patients' hospital admissions, discharges and transfers

We want to help your practice succeed under value based care. Acclivity is more than a unique technology platform. As your committed partner, we will provide the service and support you need to maximize your investment in our technology.
