

An industry first Connected Community

Acclivity's Connected Community Interoperability Framework

The Connected Community Interoperability Framework is a technology, services and workflow solution that is currently deployed in 38 states with over 2350 vendors, customers, and sources contributing to the success of the patient journeys. The focus of the Connected Community Interoperability Framework is to offer a standard means to improve the clinical and financial outcomes associated with the sickest patients in our healthcare ecosystem.

Connected Community highlights

-  Reduce ER utilization and inpatient readmissions through improved transition of care services.
-  Increase revenues from targeted programs to drive enhanced care management and better financial outcomes from your total patient panel.
-  Measure the disease burden for all your patients, without a physical examination, using Acclivity's Palliative Performance Score (PPS) estimates.
-  Build cohorts for targeted referral programs by refining the eligible patient list using palliative indicators like mortality risk, risk of hospitalization, and psychosocial issues.

Types of Connected Community members:

- Payer
- EHR
- HIE
- PBM
- TPA
- Lab
- Device/wearable manufacturer
- Risk entity (ACO, DCE, VBID, PCF)
- Third party solution (CRM, billing, etc.)
- Consulting firm that brings specialized capabilities
- Provider services organization (Advanced Primary Care, etc.)
- ACO, DCE, VBID for Hospice, PCF entity

Data that the Connected Community works with:

- Device output
- Pharmacy and Medication
- Access and Eligibility streams
- Scheduling data
- Adjudicated Claims
- Admission, Discharge and Transfer (ADT)
- Clinical data
- Assessments
- Lab values
- Patient entered

Framework capabilities:

- eMPI Patient ID and Matching
- Data ETL (Extraction, Transformation, Load)
- Data cleansing
- Data normalization
- Master Data Management supporting Quality, Cost and Utilization Data lakes (for benchmarking)

Workflow capabilities:

- Closed loop referral process
- Transitions between sites of service
- Hospital follow-up
- Benchmarking (patients, service lines, programs, contract metrics, quality outcomes, etc.)
- Patient unified, “Gold record” availabilities
- Enterprise reporting
- Payer and VBC contracting

Experience the benefits of a truly Connected Community...

The Acclivity Connected Community seamlessly leverages the network of care providers and resources already woven into the fabric of your local healthcare community.
